SOFTWARE ENGINEER

.NET Software Engineer with experience designing, developing, and deploying enterprise web applications supporting 150+ internal users in a public-sector environment. Proficient in building scalable ASP.NET Core and Blazor applications, developing RESTful APIs, and implementing secure authentication and role-based access control. Experienced in SQL Server optimization, CI/CD automation, and full SDLC practices within Agile teams. Strong focus on delivering secure, high-performance, and maintainable business solutions that improve operational efficiency and user experience.

PROFESSIONAL EXPERIENCE

Software Developer

El Paso Central Appraisal District

August 2024 – Present

- Designed and deployed Azure-hosted ASP.NET Core and Blazor Server applications supporting 150+ cross-department users, improving operational efficiency and data accessibility.
- Developed and maintained RESTful APIs to support frontend integrations and backend data services.
- Implemented secure authentication and role-based authorization using enterprise security practices to protect sensitive public-sector data.
- Engineered and optimized SQL Server database schemas, indexes, and complex queries to enhance performance and reduce data retrieval latency.
- Applied MVC architecture, SOLID principles, and layered design patterns to ensure maintainable and scalable application structure.
- Managed source control and CI/CD workflows using GitHub and Azure DevOps to streamline deployments and maintain production stability.
- Built responsive, cross-browser user interfaces using Blazor, JavaScript, HTML5, and CSS3.
- Collaborated within Agile development cycles, participating in sprint planning, code reviews, and documentation efforts.

TECHNICAL SKILLS

Programming & Frameworks: C#, .NET, ASP.NET Core, Blazor, RESTful APIs

Database: SQL Server, Query Optimization, Indexing, Performance Tuning

Cloud & DevOps: Microsoft Azure (App Services), CI/CD Pipelines, GitHub, Azure DevOps

Frontend: HTML5, CSS3, JavaScript

Architecture & Practices: MVC, Layered Architecture, SOLID Principles, Agile/Scrum, SDLC

Infrastructure & Systems: IIS Deployment, TCP/IP Networking Fundamentals, Active Directory

EDUCATION

Master of Science in Software Development
Grand Canyon University – November 2025

Bachelor of Science in Software Development
Grand Canyon University – April 2024
